Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 19 and 20, Fang et al (US 6,750,821 B2) (Figure 3) discloses an antenna comprising a ground plane; L-shaped radiators including a horizontal extending plate parallel to the ground plane and a vertically extending plate having an upper edge spaced from an edge of the horizontally extending plate so as to form a slot; a short across the slot adjacent one end thereof. Fang, however, fails to further teach a capacitive element positioned across the slot adjacent the other end thereof.

Claims 2-13 are allowed for depending on claim 1.

Regarding claims 14 and 15, none of the prior art of record, either taken alone or in combination, fairly teaches or suggests a method comprising the step of substituting for the meander line an asymmetric assemblage of a short across one end of the slot formed by the two orthogonally oriented plates and a capacitive shunt across the other end of the slot, the assemblage mimicking the action of the removed meander line.

Regarding claims 16-18, none of the prior art of record, either taken singly or in combination, fairly teaches or suggests a method of canceling transmission line impedance with the reactance of an L-shaped antenna comprising the steps of spacing apart two orthogonally oriented antenna radiators so as to form a slot between the adjacent edges of the radiators; bridging one end of the slot with a short adjacent the one end; and shunting the other end of the slot with a capacitive element, thus to form an asymmetrical L-shaped broadband antenna.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

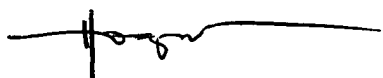

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent 6,839,036 B1 discloses a meander line loaded antenna.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang V. Nguyen whose telephone number is (571) 272-1825. The examiner can normally be reached on Mondays-Fridays from 9:00 a.m. to 5:00 p.m..
